## **Brevard County to Offer Video Streaming of SCGTV**

VIERA, Fla. – At the direction of the Board of County Commissioners, beginning with the March 9 Board meeting, video streaming of meetings and other informational programming from Space Coast Government Television will be available on the internet.

While SCGTV is currently viewable only in Brevard County through cable providers such as BrightHouse and ComCast, the video-streaming option will make it available to anyone with an internet connection.

Live video of SCGTV can be viewed by clicking “Streaming Video” at [www.brevardcounty.us](http://www.brevardcounty.us).

Both live and pre-recorded meetings, agendas, minutes and other content will also be available, and can be reached by clicking “Board Meetings” at [www.brevardcounty.us](http://www.brevardcounty.us).

The software allows for meeting minutes to be linked to a specific portion of the video, and will assist the Clerks to the Board as they transcribe the text.

The system can also be used to catalog and store video for employee development and training, and includes the capability for those inside and outside the county network to watch Board meetings at their computers.

The system was provided by vendor IQM2 at an initial cost of \$15,960 and a subsequent annual cost of \$9,960.

“Citizens have been asking for online video-streaming for years,” said SCGTV Director Kimberly Prosser. “Now there are enough people who have moved from a dial-up connection to high-speed, and away from cable TV, to make this move. In the 21<sup>st</sup> century, it’s really expected for a county of our size.”
