

VALKARIA LAKES STORMWATER PROJECT

This project converts 3 existing borrow pits located on Brevard County property into regional wet detention stormwater ponds. These ponds are designed to treat runoff from a 456 acre drainage basin of mostly single family residential lots. In 2006, the County applied to FDEP for a grant to partially fund the design and construction of the project. Through an Interlocal Agreement with the Town of Grant-Valkaria, the County is managing the State grant as well as the project's design and construction. The Town will reimburse the County for the local match required for the grant. Project construction was started in September, 2011 and should be complete by the end of the year.
