Recycling: (321) 633-2043  
FAX: (321) 633-2038

Dear Customer,

Over the past couple of years, the state of Florida, as well as many other states, has experienced an historical number of home foreclosures due to the economic and real estate markets. This, in turn, has created the need for proper disposal of enormous amounts of household hazardous materials that are left in these foreclosed homes. The Brevard County Solid Waste Household Hazardous Waste (HHW) Collection Program has established best management practices (BMP's) for accepting, handling, packing and disposing/recycling these materials. The following outlines the current BMP's for company's working with financial institutions to properly dispose of these materials.

- 1) Foreclosure materials will be accepted at the HHW collection centers on Tuesdays and Wednesdays only at the Central Disposal Facility (2250 Adamson Rd. Cocoa) and at Mockingbird Mulch Facility (3600 South St. Titusville).
- 2) Hours of operation at the HHW collection centers are from 8:00 am to 4:00 pm on Tuesdays and Wednesdays.
- 3) A limit of 20 gallons per home only will be accepted. Routine household cleaning and maintenance products will be accepted such as paint, lawn and garden products, insecticides, pesticides, solvents, motor oil and household cleaners.
- 4) Materials will be accepted only with a copy of the work order (from financial institution) per each home. Copies of work order(s) to be left with technicians at HHW centers.
- 5) Foreclosure materials will only be accepted from foreclosed homes in Brevard County.
- 6) The following material(s) will NOT be accepted:

- containers larger than five gallon
- bio-hazardous materials (sharps)
- radioactive materials
- compressed gas cylinders larger than 30 gallon
- commercial /industrial generated hazardous materials (businesses, non-profits, Government agencies)
- ammo greater than 50 caliber
- bilge water
- fire extinguishers
- cooking oil
- explosives

If you should have any questions regarding this information, feel free to contact me at (321) 633-1888. Thank you for your attention concerning these matters.

Sincerely,

Rita Perini  
Environmental Scientist
